PRODUCT INFORMATION

CUTTING POINT Series

For Beautiful Stitching on Fine Leathers

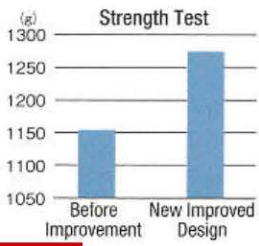

ORGAN NEEDLE CO., LTD.

A wide variety of designs are possible

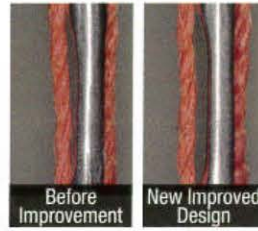

Straighter Stitching

With the new improved design, the needle is stronger. Furthermore needle deflection that causes skipped stitches has been significantly reduced.

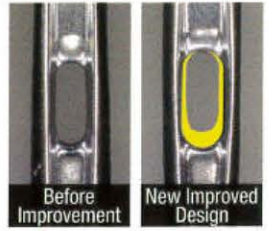

Consistent Loop Formation

For consistent loop formation, we adapted our unique Cliff Scarf to make enough space between the thread and needle.

Thick Threaded Designs possible

By making the needle eye bigger, the normal filament thread #5 can now be used with needle size #21. As well filament thread #0 can be used with needle size #23.

STANDARD CUTTING POINTS

| 先端形状 Symbol 針頭形状 | | | | | | | | |
|--|---------|-----------|---------|-------|-----|-----|-----|--|
