

ORGAN[®] NEEDLES

“Spi” Acute Round Point (Slim Set Point) Microtex needles

“Spi” Slim Set Point (Acute Round Point) needles with an acute, very slim point are ideal to create accurate piercing of densely woven materials. The very slim, acute shape point makes precise seams while avoiding seam puckering.

Applications:

- Very densely woven materials (like microfibers and silk)
- Thin smooth materials, (taffeta)
- Thin coated materials
- Normal seams in shirt stitching (shirt collars, cuffs)
- Elastic materials like spandex, silicone, polyurethane, anidex fiber materials
